

CBE DS-300 electroblock connection diagram using CCW011 coupler

The CCW011 coupler is equipped with a mechanical switch for the selection of CBE panel and its fresh water probe type installed.

This coupler supports only one level waste water probe (empty / full).

By using this switch you can select between 3-level and linear electronic fresh water probes.

CBE panels PC100, PC110 and PC180 use 3-level probes SP5/40, while panels PC200, PC210, PC220, PC320 and PC380 use SPE electronic probe.

- The position of the switch for electronic water probe
- The position of the switch for 3-level water probe

The correct option must be set also in the Service settings menu of the mobile App.
